Progress Update

The basement foundation walls continue to be formed and poured, electrical utilities relocation and soil corrections are nearly complete, and sequence 1 utilities are underway. Main level foundations and CMU for south elevator and stairwell will be starting soon. We continue to push hard while the weather is warm!

Upcoming Work

- Sequence 1 utilities: storm and sanitary sewer
- Main Level Foundations
- Backfill Lower Level Foundation Walls
- CMU Masonry

Safety Topic

Fall Driving Tips

During this time of year, the temperatures begin dropping and leaves begin falling. These changing conditions can cause hazards while driving such as:

- Poor Visibility due to falling leaves, rain, or fog.
- Wet leaves can cause slippery conditions. Keep a safe distance from the car in front of you to prevent a collision.
- Morning frost is coming and it will soon be necessary to scrape your car windows in the morning. The frost may also create slippery conditions on the roadway.
- Children enjoy playing in piles of leaves. Use caution when driving near piles of leaves.

Project Countdown: 83 Weeks to Certificate of Occupancy

Quality Corner

Temporary Light:
Portable light towers have been set up near the lower level to provide temporary light. Since the sun is setting earlier and it gets dark sooner, these lights will allow for quality work to still be done as the sun goes down. These light towers also add a safety aspect to the project.

DID YOU KNOW?

Weekly progress photos are taken in constructionSite using a 360 camera and can be viewed [HERE](#). This gives a good view on how construction has progressed on a week by week basis.
